

Properties of the product „natural gas coalescence - filter“

- Service pressure: 0-260bar
- Service temperature: -40°C up to 85°C
- Pressure stable in filling and operation direction
- Small construction
- Corrosion-resistant
- All seals are suitable for CNG
- Certification: ECE R 110
- The valve is equivalent of heavy metal regulation
- Burst pressure: > 700bar, 20°
- Fitting for 8, 10, 12mm tube or 1/2"
- Filter: 0,3µm, absorption: >99,99%
- Massflow: 110kg/h, 260bar, 15°C, CNG
- KV: 0,9
- Tightness: 1x10⁻⁵mbar l/s, 20°C, 100% He
